

# Absolute & piston gauge MPA

## PURPOSE

Calibration, verification of pressure measuring instruments.

## FIELD OF APPLICATION

Metrological laboratories.

Fully functional replacement of deadweight tester of type	2465, 2468, МПА-15, МПАК, МАД-720, МАД-3М
Verification and calibration of measuring instruments of: pressure calibrators, barometers, pressure measuring transducers (sensors), digital pressure gauges, deadweight testers, accuracy classes 0.008 and rougher	in the range from $-0,1$ to $10$ mPa
Measurement range	from $0,7 \cdot 10^{-3} \dots 0,02$ mPa, to $0,06 \dots 10$ mPa
Temperature working range	$18 \dots 28$ °C
Working environment	air and nitrogen
