

## Analyzer of combustive and lubricating materials СИМ-12

Quick-look (field) analysis of quality of combustive and lubricating materials: measurement of mass of mechanical impurities (rapid method).

Spheres of application: transport, mining, oil and gas industry (ensuring the field operation of the motor vehicle fleet).

Type	Purpose	Range (error)	Dimensions, mm device/sensor	Mass, kg, not more than
СИМ-12	measurement of mass of mechanical impurities (rapid method)	(0,005-0,1)% ±10%	200x160x70/ Ø110,h70	1,2
