

Analyzer of combustive and lubricating materials, СИМ-3Б (СИМ-3БП – portable variant)

Quick-look (field) analysis of quality of combustive and lubricating materials: measurement of the octane number (grade) of gasoline and determination of the grade of diesel fuel – laboratory version (rapid method).

Type	Purpose	Range (error)	Dimensions, mm device/sensor	Mass, kg, not more than
СИМ-3Б	measurement of the octane number (grade) of gasoline and determination of the grade of diesel fuel – laboratory version (rapid method)	76-89 (motor method) 76-98 (research method) ±1 octane number	200x160x70/ diameter (Ø)50, height (h) 115	1
СИМ-3БП	measurement of the octane number (grade) of gasoline and determination of the grade of diesel fuel – laboratory version (rapid method)	76-89 (motor method) 76-98 (research method) ±1 octane number	160x90x40/ Ø 50, h 115	0,5
